
TWIG

SOLAR POWERED AUDIO PLAYERS

ABOUT

Audio Player - When a message needs to be shared broadly, the Twig is a secure solution. Focusing on keeping costs low, instead of rugged durability, Solar Grove Solutions developed the Twig for organizations that needed a "disposable", yet secure solution to share their message. The Twig is the perfect option to make sure audio content like health and medical information, safety and disaster response guidance, or any other critical message is easily accessible. With intuitive and tactile navigation controls, the Twig player helps bring critical messages to individuals and small groups so they can easily engage with it.

Player color, memory size, rechargeable or standard AA battery and, of course, the level of security are all customizable for the Twig to fit its specific target.

SPECIFICATIONS
